

Find Smallest Subarray

with Given Sum

Given an array of positive numbers and a positive number 'S', find the length of the **smallest contiguous subarray** whose sum is greater than or equal to 'S'.

Return 0, if no such subarray exists.

Input: [2, 1, 5, 2, 3, 2], S=7

Output: 2

The smallest subarray with a sum greater than or equal to '7' is [5, 2].
